Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7, 8, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saito et al. in view of Evans et al. Saito et al. discloses the invention including at least one unit base (21) capable of carrying at least one unit (Fig. 1), a platen (13) for sliding the unit base (Fig. 1), a linear motor (10) comprising at least one stationary member mounted on the platen (11) and a moving member mounted on the unit base (12) but fails to disclose a dissipation portion comprising a heat dissipation fin disposed parallel with a direction of sliding movement. Evans et al. teaches the use of a heat dissipation portion (Abstract) comprising a heat dissipation fin disposed parallel with a direction of sliding movement (3). Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have provided Saito et al. with a heat dissipation portion, as taught by Evans et al., to control the heat level during operation.

Response to Arguments

3. Applicant's arguments filed 04 September 2003 have been fully considered but they are not persuasive. The use ^{of} a heat dissipation fin to cool an object is old and well known in the art. Evans et al. teaches a method and apparatus for cooling an electric

Art Unit: 3724

device with a fin to electric device disclosed by the Saito et al. patent. Therefore, the rejection is valid and will remain.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
